

## **IDESS Maritime Centre (Subic) Inc.**

### **Tropical Further Offshore Emergency Training Course**

#### **Description:**

This program is designed to further onshore safety and emergency response training and assessment requirements for personnel working in the offshore oil and gas industry in a warm water (tropical) environment.

#### **Objectives:**

During the Tropical FOET program delegates shall have the opportunity to practice and demonstrate skills which are not possible to practice offshore during drills, exercises and offshore training.

#### **Course Outline:**

- Emergency First Aid
- Firefighting and Self Rescue
- Helicopter Safety and Escape

The course may be conducted with or without the Emergency Breathing System (EBS) depending on client requirements.

#### **Entry Standards:**

This course is open to persons holding a valid OPITO Tropical BOSIET or Tropical FOET course certificate.

Trainees shall be medically fit for physical training.

Minimum number of participants is four (4) and maximum is sixteen (16).

#### **Certification:**

A certificate of successful completion shall be issued to those delegates who successfully complete the course and meet the assessment criteria. The certificate is valid for four years.

#### **Accreditation:**

OPITO Approved

#### **Duration:**

1 Day
